01.

Vision

Huddle Vision

Easy to use, secure, file sharing and collaboration platform for internal and external teams. Facilitating the creation, gathering and approval of content.

How do we do this?

Bringing people, content and actions into a single platform underpinned by best in class usability, industry leading security credentials and baseline integrations

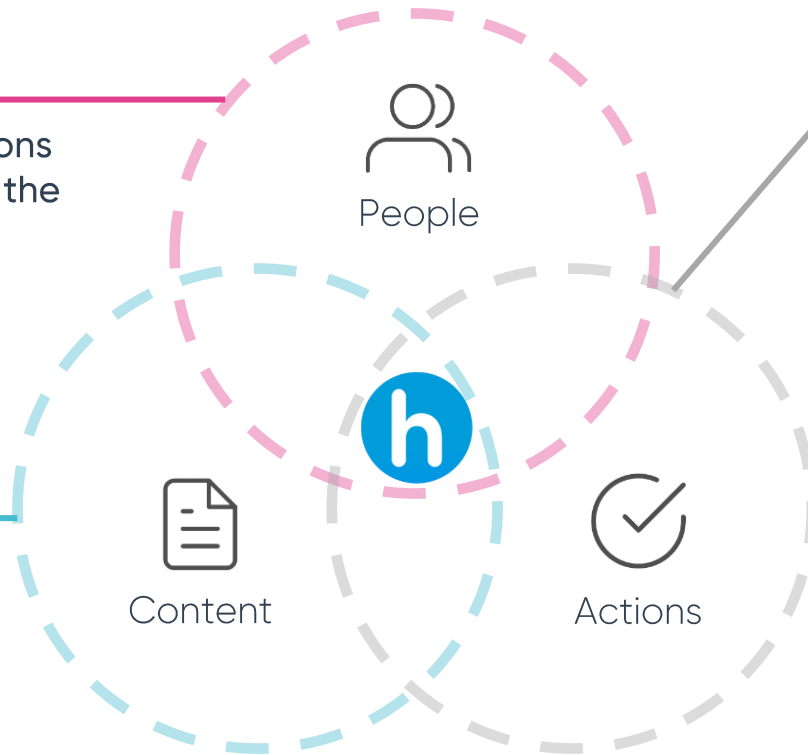

Insights and Administration

Leverage knowledge of the interactions between users, content, actions and the collective to increase productivity.

Easy and Secure File Sharing

Make it easy and safe to share content within or beyond your organization.

File-centric Content processes

Enable users to work together to produce content from the initial request through to finalization.

Underpinned by:

-  Security & Compliance
-  Industry leading UX
-  Integrations & API

02.

Release

Product release update

Release 169 June 2022

Product / Feature work

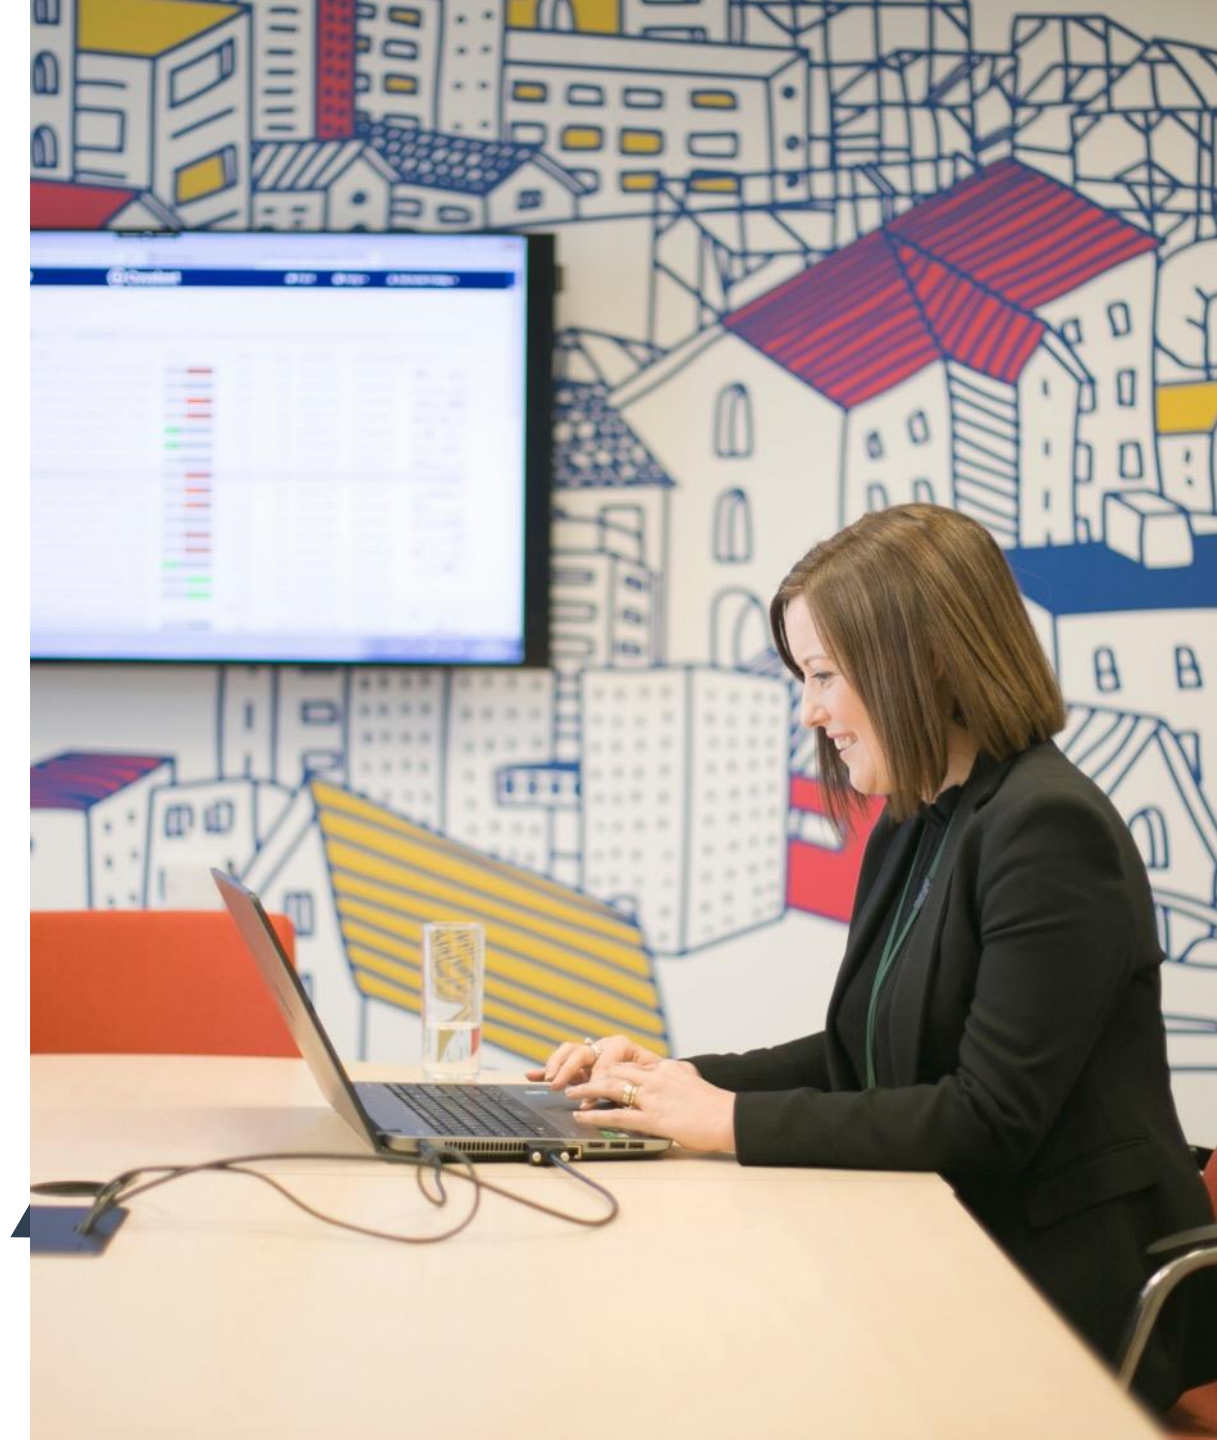

- Updated Error messaging when reaching your bookmark limit.
- Removed extra new lines being created in Huddle comments when hitting enter.
- Behind the scenes work on 'bulk actions' in Tasks, ready for a future release.
- Behind the scenes work to improve our 'File' experience, ready for a future release.
- Various bug & performance fixes.

Accessibility updates

- Improved multiple instances of keyboard navigation whilst using screen readers.
- Improved how Huddle handles browser zoom.
- Increased contrast of multiple elements to meet WCAG 2.1 compliance.
- Added accessible labels to missing elements

Huddle desktop

- Huddle Note can now be opened from the folder browser
- Upgraded jQuery to 3.5.1
- Huddle avatars now display in Huddle Desktop
- Added a troubleshooting configuration to Huddle desktop to help with Support issues
- Various Bug & Performance fixes

Q4 2022

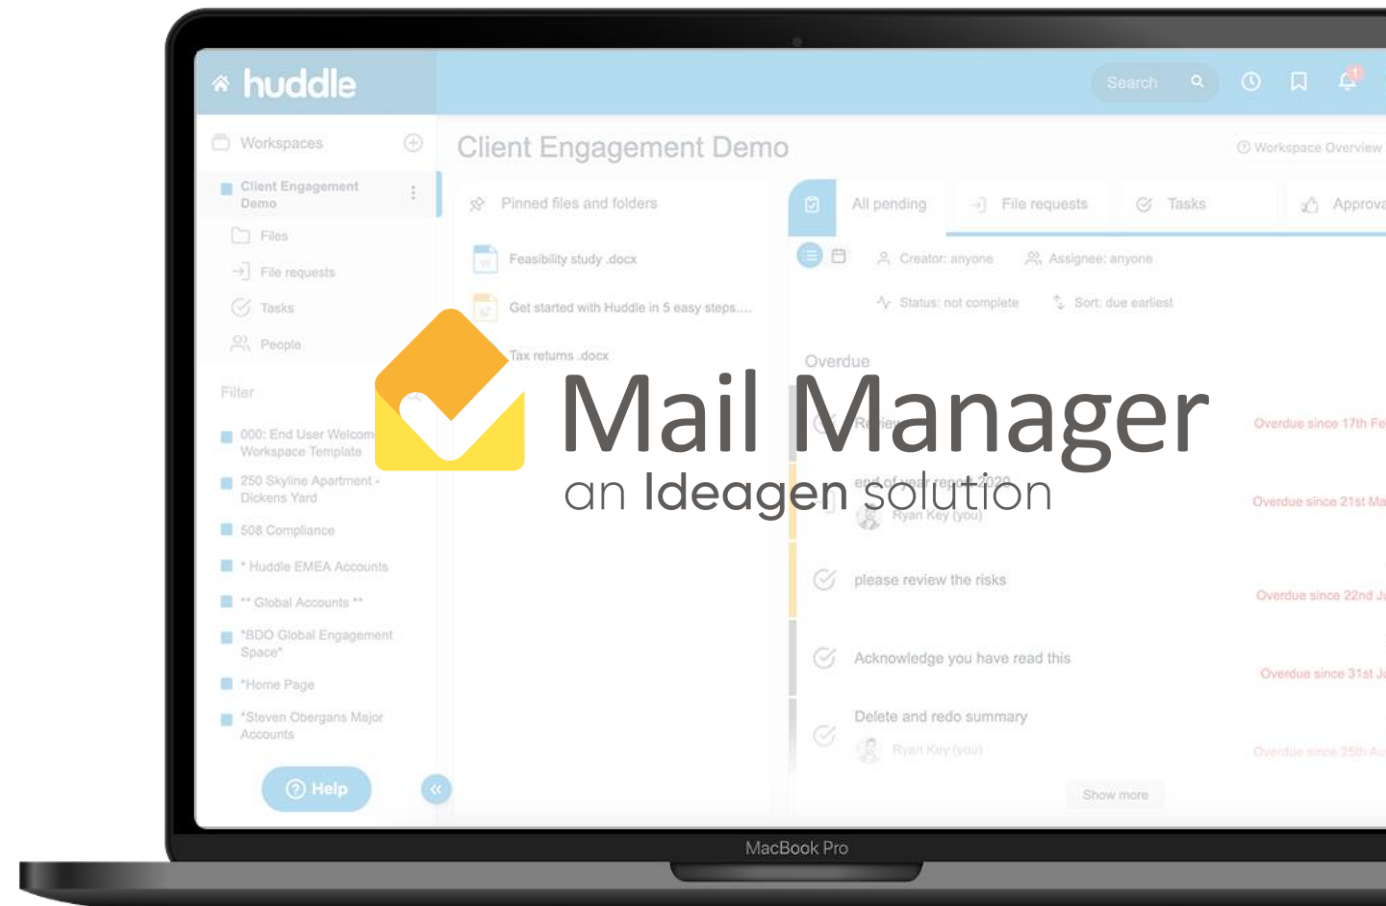

Q1 2023

Future

Advanced Actions

A more efficient way to make updates to multiple tasks in one go:

- Delete
- Dates
- Status
- Assignee
- Attach
- Drag and drop file attachments

Q1 2023

Future

Out of Office

Deliver notifications to a Huddle user when another Huddle user is Out Of Office.

- Sync with the Microsoft API - setting yourself as OOO in teams or Outlook, will also set yourself away in Huddle.
- In app functionality to manage OOO if you don't access Huddle through SSO or an Active Directory.
- The focus for notifications will be on @mentions and assignment of File Requests, Approvals and Tasks.

Q4 2022

Q1 2023

Future

E-signature

Bring e-signature functionality to Huddle, enabling our users to create, edit, share, store and sign their files all from the same solution.

- Send one or multiple documents to workspace members to sign.
- Display verified signatures in File Preview.

File Request

Our next iteration of File Request, adding highly requested changes and features.

- Grouping, templating & custom status options
- Transition into the Tasks UI with bulk functionalities.

Q1 2023

Future

PleaseReview Integration

Seamless integration with PleaseReview.

- Send Huddle content to PleaseReview with workspace members
- Check in to Huddle when complete
- Audited for compliance

Webhooks

Lightweight API for our customers on Huddle notification & activity

- Event based API rather than polling
- Subscription notification
- Better integration capability

Thank you
